Safety system ZeroFlex

The SUPATRAY ZeroFlex grid redefines raised outdoor flooring, offering a solid modular substructure free from design constraints. Made from high-quality polypropylene and measuring 24" x 24" - 60 x 60 cm, it connects precisely using dedicated locking discs to create a solid, stable, and perfectly integrated surface.

Artificial Turf Installation System

The combination of the ZeroFlex grid and the SUPATURF panel creates well-draining, stable, and perfectly flat surfaces for artificial turf raised floors, making them ideal for terraces, rooftops, and hanging gardens.
